What is Can Read Level?

Can Read Level is a system that categorizes children's reading abilities based on the complexity of the texts they can read independently. It was developed by the American Reading Council and is widely used in schools, libraries, and homes to track children's reading progress.

Can Read Levels are typically represented as a series of numbers, with each number corresponding to a specific reading stage or grade level.

Each level is associated with certain reading skills, vocabulary, and text complexity.
