- **Chords:** Chords are groups of three or more notes played simultaneously. They provide harmonic support for melodies and create the overall sound of a piece of music.
- **Rhythm:** Rhythm is the temporal aspect of music. It refers to the duration and organization of notes in time.
- **Harmony:** Harmony is the relationship between multiple notes played simultaneously. It creates the sense of tension and release that makes music engaging.
- **Form:** Form refers to the overall structure of a piece of music. It determines how the different sections of a composition are organized and how they relate to each other.
